

Set of Pages for a Professional Video Editing Platform

Core Editing Workspace (Necessary)

These pages form the heart of your platform — where users actually create and edit videos.

1. Editor Workspace

The main editing interface. This is where users spend 90% of their time. It typically includes:

- **Video Preview / Canvas** — Real-time preview of the edited video
- **Multi-Track Timeline** — Layered editing for video, audio, and images with drag-and-drop, splitting, trimming, and snapping
- **Media / Asset Panel** — Imported files, stock media, and project assets
- **Toolbar** — Editing tools (cut, trim, split, zoom, text, transitions, effects)
- **Property / Effect Controls Panel** — Adjustments for selected clips (transform, color, audio, effects)

2. Project Dashboard

A central hub where users manage all their video projects. The dashboard typically includes:

- **Project List** — All user projects with thumbnails, titles, and timestamps
- **Quick Stats** — Total projects, videos, storage usage, export queue status
- **Recent Activity** — Recently edited or exported projects
- **Quick Create** — Button to start a new project

3. Export / Render Page

Where users configure and export their final video. Key elements:

- **Export Settings** — Resolution, frame rate, bitrate, format (MP4, MOV, etc.)
 - **Preset Options** — Quick presets for social media platforms (YouTube, Instagram, TikTok)
 - **Export Queue** — Status of ongoing and completed exports
 - **Download Link** — Final rendered video file
-

Account & Management (Necessary)

4. Authentication Pages

- **Login Page** — Email/password, social login (Google, GitHub)
- **Registration / Sign-Up Page** — New user registration
- **Password Reset Page** — Forgot password flow

5. User Profile & Settings

Central hub for user account management:

- **Profile Settings** — Name, avatar, email, password
- **Notification Preferences** — Email and in-app notification settings
- **Workspace Settings** — Team name, branding, privacy
- **Data Processor Settings** — Privacy and data handling preferences

6. Billing & Subscription

For monetized platforms:

- **Subscription Plans** — Free, Pro, Enterprise tiers with feature comparison
 - **Payment Settings** — Credit card, PayPal, invoices
 - **Billing History** — Past invoices and payment records
-

Marketing & Public Pages (Necessary)

7. Home / Landing Page

The public-facing entry point to your platform:

- **Hero Section** — Value proposition, headline, CTA
- **Features Overview** — Key platform capabilities
- **Social Proof** — Testimonials, client logos, user stats
- **Pricing** — Plan comparison and CTA

8. Features / Product Pages

Detailed pages explaining platform capabilities:

- **Core Features** — Timeline editing, effects, transitions, AI tools
- **AI Tools** — Auto-captions, background removal, text-to-speech
- **Integrations** — Cloud storage, social media publishing

9. Pricing Page

Clear breakdown of plans and pricing tiers

10. Blog / Resource Center

Educational content to attract and retain users:

- Tutorials and how-to guides
- Industry news and trends
- Case studies

11. Help Center / Support

Documentation and support resources:

- **FAQ** — Common questions and answers
- **Knowledge Base** — Articles and guides
- **Contact Support** — Ticket submission or live chat

12. About Us / Company Page

Brand storytelling and team information

13. Contact Page

Business inquiries and partnership opportunities

Advanced & Optional Pages

14. Free Tools / Programmatic SEO Pages

Many platforms (like VEED.io) attract traffic through hundreds of programmatic SEO pages for free tools:

- **Video Converter** — MKV to MP4, AVI to MP4, etc.
- **Video Compressor** — Reduce file size
- **Screen Recorder** — Record and edit
- **Subtitles / Captions** — Auto-generate subtitles
- **Background Remover** — AI-powered background removal

15. Collaboration & Sharing Pages

- **Share Project** — Generate shareable links with view/edit permissions
- **Collaborator Management** — Invite, remove, and manage team members
- **Comment & Review** — Feedback and annotation on specific timeline points

16. Analytics Dashboard

For tracking usage and performance:

- **Video Performance** — Views, engagement, retention
- **Workspace Analytics** — Team activity, project counts, storage usage
- **Export Analytics** — Export volume, formats used

17. Admin / Enterprise Dashboard

For team and enterprise users:

- **User Management** — Add, remove, and manage team seats
- **Usage Reports** — Team-wide activity and resource consumption
- **Security Settings** — SSO, access controls, compliance

18. Workspace Switcher

For users managing multiple teams or workspaces

19. Templates Library

A gallery of pre-made video templates for different use cases (social media, ads, presentations)

20. Media Library / Asset Management

Centralized storage for user-uploaded media, stock assets, and brand kits

Summary Table

Category	Necessary Pages	Optional / Advanced Pages
Core Editing	Editor Workspace, Project Dashboard, Export Page	Templates Library, Media Library
Account & Management	Login, Register, Profile Settings, Billing	Workspace Switcher, Admin Dashboard
Marketing & Public	Home, Features, Pricing, Blog, Help Center, About, Contact	—
SEO & Growth	—	Programmatic SEO Tool Pages (Converters, Compressors, etc.)
Collaboration	—	Share Project, Collaborator Management, Commenting
Analytics	—	Analytics Dashboard, Usage Reports

Implementation Notes

Consideration	Recommendation
Single-Page Application (SPA)	Most modern video editing platforms (VEED, CapCut, Canva) use a single-page architecture with client-side routing. This reduces load times and provides a seamless experience.
Mobile Responsiveness	Ensure dashboards, settings, and marketing pages are fully responsive. The editor itself may require a desktop viewport for the timeline and canvas.

Consideration	Recommendation
Performance Optimization	Use lazy loading, code splitting, and optimized asset delivery — especially for the editor workspace which loads heavy media and rendering libraries.
SEO Strategy	Programmatic SEO pages (free tools, converters, etc.) are a proven strategy. VEED.io created 632 pages covering 70+ tools, generating 2.3+ million monthly visits from Google.
User Onboarding	Include a welcome/onboarding flow for new users to guide them through the editor and key features.
